DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species:

Electron acceptor materials. Applicant should select an electron acceptor material from the group consisting of (see claim 2 for reference) an aromatic compound having a nitro group, an aromatic compound having a cyano group, an olefin compound having a nitro group, an olefin compound having a cyano group, a perylene compound having a nitro group, a perylene compound having a cyano group, a heterocyclic compound having a nitro group, a heterocyclic compound having a cyano group, 2,4,7-trinitrofluorenone, 2,4-dinitroaniline, 5-nitroanthranilonitrile, 2,4-dinitrodiphenylamine, 1,5-dinitronaphthalene, and 3,5-dinitrobenzonitrile.

2. This application contains claims directed to the following patentably distinct species:

Electron donor material. Applicant should select a single electron donor material from the group consisting of (see claim 12 for reference) an aromatic compound having a hydrogen, an aromatic compound having an alkyl group, an aromatic compound having a phenyl group, an aromatic compound having a NR_2 group, an aromatic compound having an OR group, an aromatic compound having a SiR_3 group, an olefin compound having a hydrogen, an olefin compound having an alkyl group, an olefin having a phenyl group, an olefin having a NR_2 group, an olefin having an OR group, an olefin compound having a SiR_3 group, an allene compound having a hydrogen, an allene compound having an alkyl group, an allene compound having a phenyl group, an allene compound having an NR_2 group, an allene compound having an OR group, an allene compound having a SiR_3 group, a thiophene compound having a hydrogen, a

thiophene compound having an alkyl group, a thiophene compound having a phenyl group, a thiophene compound having an NR_2 group, a thiophene compound having an OR group, a thiophene compound having a SiR_3 group, a fulvalene heterocyclic compound having a hydrogen, a fulvalene heterocyclic compound having an alkyl group, a fulvalene heterocyclic compound having a phenyl group, a fulvalene heterocyclic compound having a NR_2 group, a fulvalene heterocyclic compound having an OR group, a fulvalene heterocyclic compound having a SiR_3 group, poly(3,4-ethylene-dioxythiophene), tetraphenylethylene, azulene, 1,2,3,4-tetraphenyl-1,3-cyclopentadiene, and bis(ethylenedithio)tetrathiafulvalene.

3. The species are independent or distinct because the species comprise different structures and functional groups which result in different properties.
4. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-16 are generic.
5. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.
6. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 1774

7. A telephone call was not made to request an oral election to the above restriction requirement, because of the complexity of the requirement.

8. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

9. The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

10. Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

11. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dawn Garrett whose telephone number is (571) 272-1523. The examiner can normally be reached Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rena Dye can be reached at (571) 272-3186. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
